PRODUCT INTRODUCTION

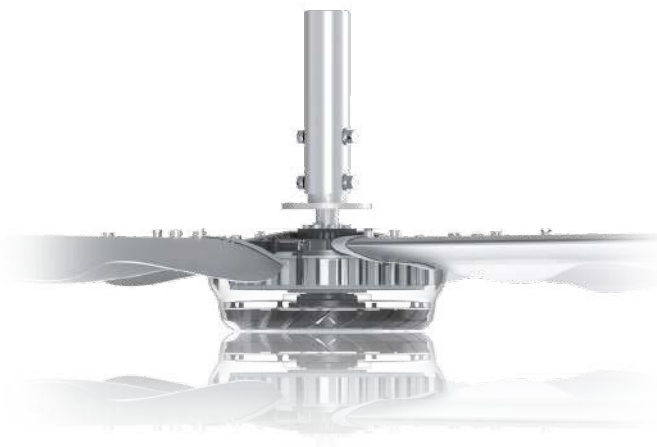

HKM Aircool series introduces a new type of HVLS fan, developed based on PMSM (Permanent Magnet Synchronous Motor) technology. This fan is specifically designed for use in public and commercial spaces such as bars, restaurants, gyms, hotel lobbies, and more.

Featuring a distinctive wing-shaped aerodynamic blade design, the HKM Aircool is capable of delivering an impressive airflow of up to $7550\text{m}^3/\text{min}$. With a stable rotation speed, HKM Aircool provides unparalleled comfort compared to traditional fans. Standing beneath the HKM Aircool you'll experience multidirectional airflow, akin to the natural breeze system found outdoors, resulting in a cooling effect of 4-7 degrees Celsius that you can feel on your skin.

Three-dimensional Air Circulation

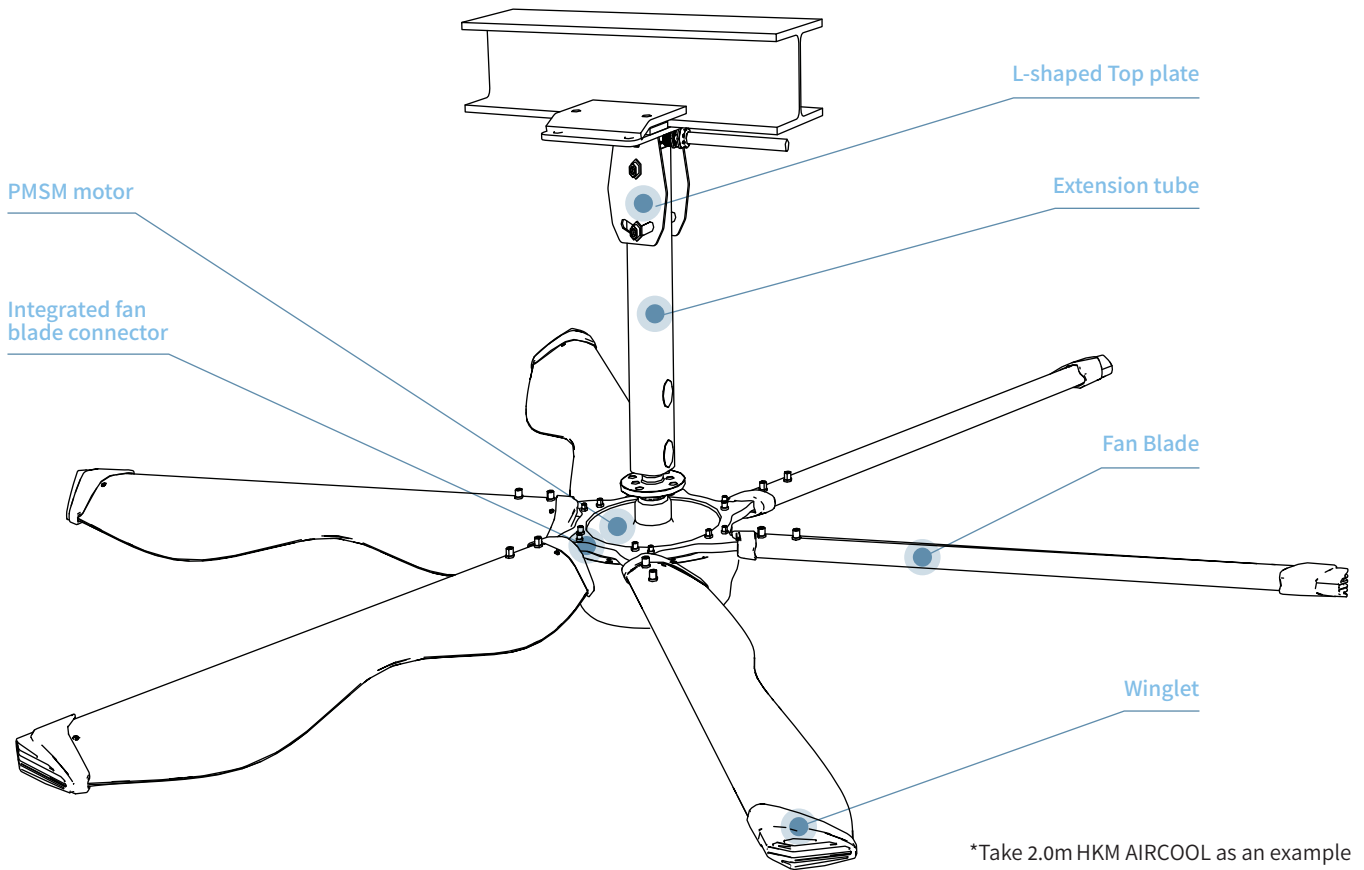

High Air Volume,
Large Space Ventilation, Comfortable and Healthy

High Efficiency

A single fan can cover more than 1000m^2
(Air volume is superior to that of 100 ordinary fans)

PRODUCT SELLING POINT

Quiet and Low Noise

Natural Airflow
Low Wind Noise
Enjoy Comfort and Quiet

Exquisite Design

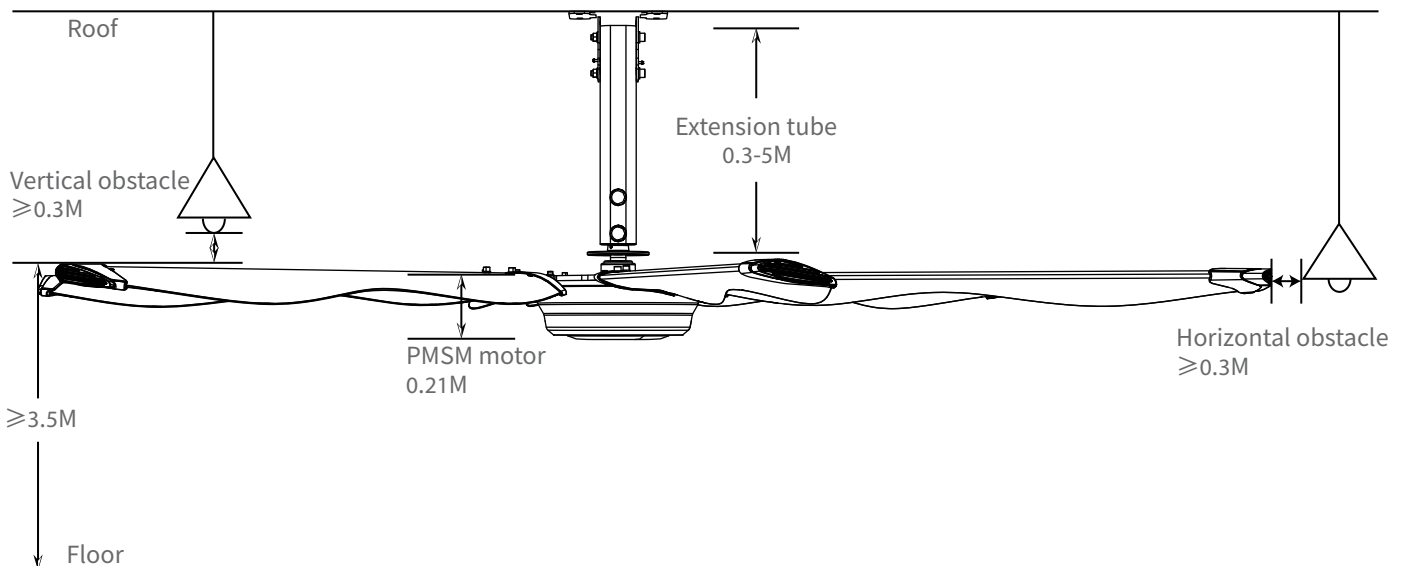

One Piece Corrugated Fan Blade
Design Minimalist and Fine
Workmanship Ingenuity Everywhere

Super Energy Saving

Conform to National Standard GB30253
-2013 and Reaches Grade 1 Energy Saving
Efficiency Saving the Costs for You

● Flexible Installation

● Multi-scenario Use

A photograph of a modern interior hallway. The ceiling features a large, white, multi-bladed ceiling fan. The walls are finished with light-colored wood paneling and dark trim. The floor is made of light-colored stone tiles. In the background, there are some decorative lanterns on the floor. The image is framed by a large, semi-circular blue graphic element in the bottom right corner.
